Jumping with controller gesture's (physics based)

also, combine a trackpad jump + controller jump to do tricks!!!!

Tricks like - Dodging, Doublejump, Speed jumping (time to strafe jump in vr lads!)

To initiate hold down the climb button, move your controllers down quickly and then release the button, you should quickly get the hang of it, it is all about timing the release correctly. You can use this to push yourself in any direction, for extra fun, jump using the trackpad, then dodge left or right!

Full Climbing!

Finally, if there is a wall you see that looks bad ass, you can climb right up that bad boy! Why? Because you can! and it's fun!

I was screwing around on the store until I came upon this gem it was not out yet but boi am I happy the wait is over. This game is something that kinda gives you that binding of Isaac feeling to it how it is creepy and disturbing in some ways but unlike the binding of Isaac you can't just start and expect it to be simple and easy to beat for this games boss's you must plan to beat them and that is something you don't see in alot of games. in this game the bosses are not just the same with some other skin and other attacks added to it each boss has its own pattern and if you don't learn that pattern,have a fun time beating this game. Anyway I think this game was worth the wait and my money I rate it a 9\10. I can't believe I forgot to go to the gym today. That's 7 years in a row now.. i think this game is noticeably better that the last zombie exodus and i recommend both this and the old one. i cant wait for the next part to come out so i can play it. I'm looking forward to the next part. This is a game for people on reddit who have never read a single HP Lovecraft story but say things like, "whoa that's some cthulu sh*t! totally lovecraftian!" It is a briefly entertaining shooter with references to Lovecraft's work that those same people with no clue about the inspired works will enjoy. There's no horror, no scares, but lots of rooms full of endless, endless skeletons to shoot at mindlessly if that's your thing.

All I'm saying is, don't expect to do any investigating. Don't expect to feel that special kind of unease. Don't expect any fun and original "lore" beyond generic tropes. And don't expect any challenge.

This would have been a fun flash game on Newgrounds.. Not bad for a little city builder but right now the experience is a bit shallow. Wait until it's out of EA.. No Bueno. Mouse doesn't work. Am I going to lose my time trying to fix it ?. Huge bugs in this game. I have been a Heroes Fan forever and just objectively, there are so many bugs and this game is such garbage.

Here's an example of a few bugs after the game has been out for more than a year:

-Governor's bonus +8 might in town area of control NOT WORKING appropriately

-If you cast a firewall, the computer will just stay in it and move back and forth. So you can destroy a massive army by just using firewall.

-I like to play on the hardest difficulty, but even for people who play on easiest bugs, please peruse reviews for what more casual people don't like about this game, AND DON'T BUY THIS GAME

Overall, even if you are a huge heroes fan, DON'T BUY THIS GAME!! Because it is unsatisfying to play this game when there are so many bugs, and then you see this and you just wasted your time.

Tough and fun. Avoid slowing down in the walls if you want to stay alive.. Always trolls, made a video about it: ESEA Vs Faceit.... Not worth buying trolls every game, very toxic and karma system is just gonna be there to f*ck you up with trolls on team. Would use 6.99 for ♥♥♥♥♥♥♥♥s f*ck this♥♥♥♥♥♥♥♥. Dont buy save your money. dlcs dlcs dlcs =money money money. greedy bastard. Windows Runtime error crashing the game at what im guessing was near the end of the tutorial sequence
